S U M M A R Y

Presented in this compilation are a series of market statistics for the years 1967 and 1968 pertaining to Federal Order No. 4, which regulates the handling of milk in the Delaware Valley Marketing Area.

Prices

The average of the monthly uniform prices paid to Delaware Valley order producers during 1968 was \$6.18 per hundredweight, a gain of 16 cents over the \$6.02 average price paid in 1967. From 1966 to 1967 there was an average gain of 26 cents per hundredweight in the uniform price paid to market producers. The annual price for Class I milk increased an average of 38 cents per hundredweight in 1968 (following a 37 cent advance in 1967), while the Class II price, which had increased only 7.5 cents in 1967, advanced 22.1 cents in 1968. The average Class I milk price for 1968 was \$6.91 per hundredweight and the Class II average rate was \$4.21.

During March through June 1968, producers were paid in accordance with the base-excess provisions of Order No. 4, which were added by amendment to the Order August 1, 1967. During the four base paying months 696.7 million pounds or 87.2 percent of the milk delivered by producers was base milk. The average base milk price during March through June was \$6.27 per hundredweight,

Milk Receipts and Utilization

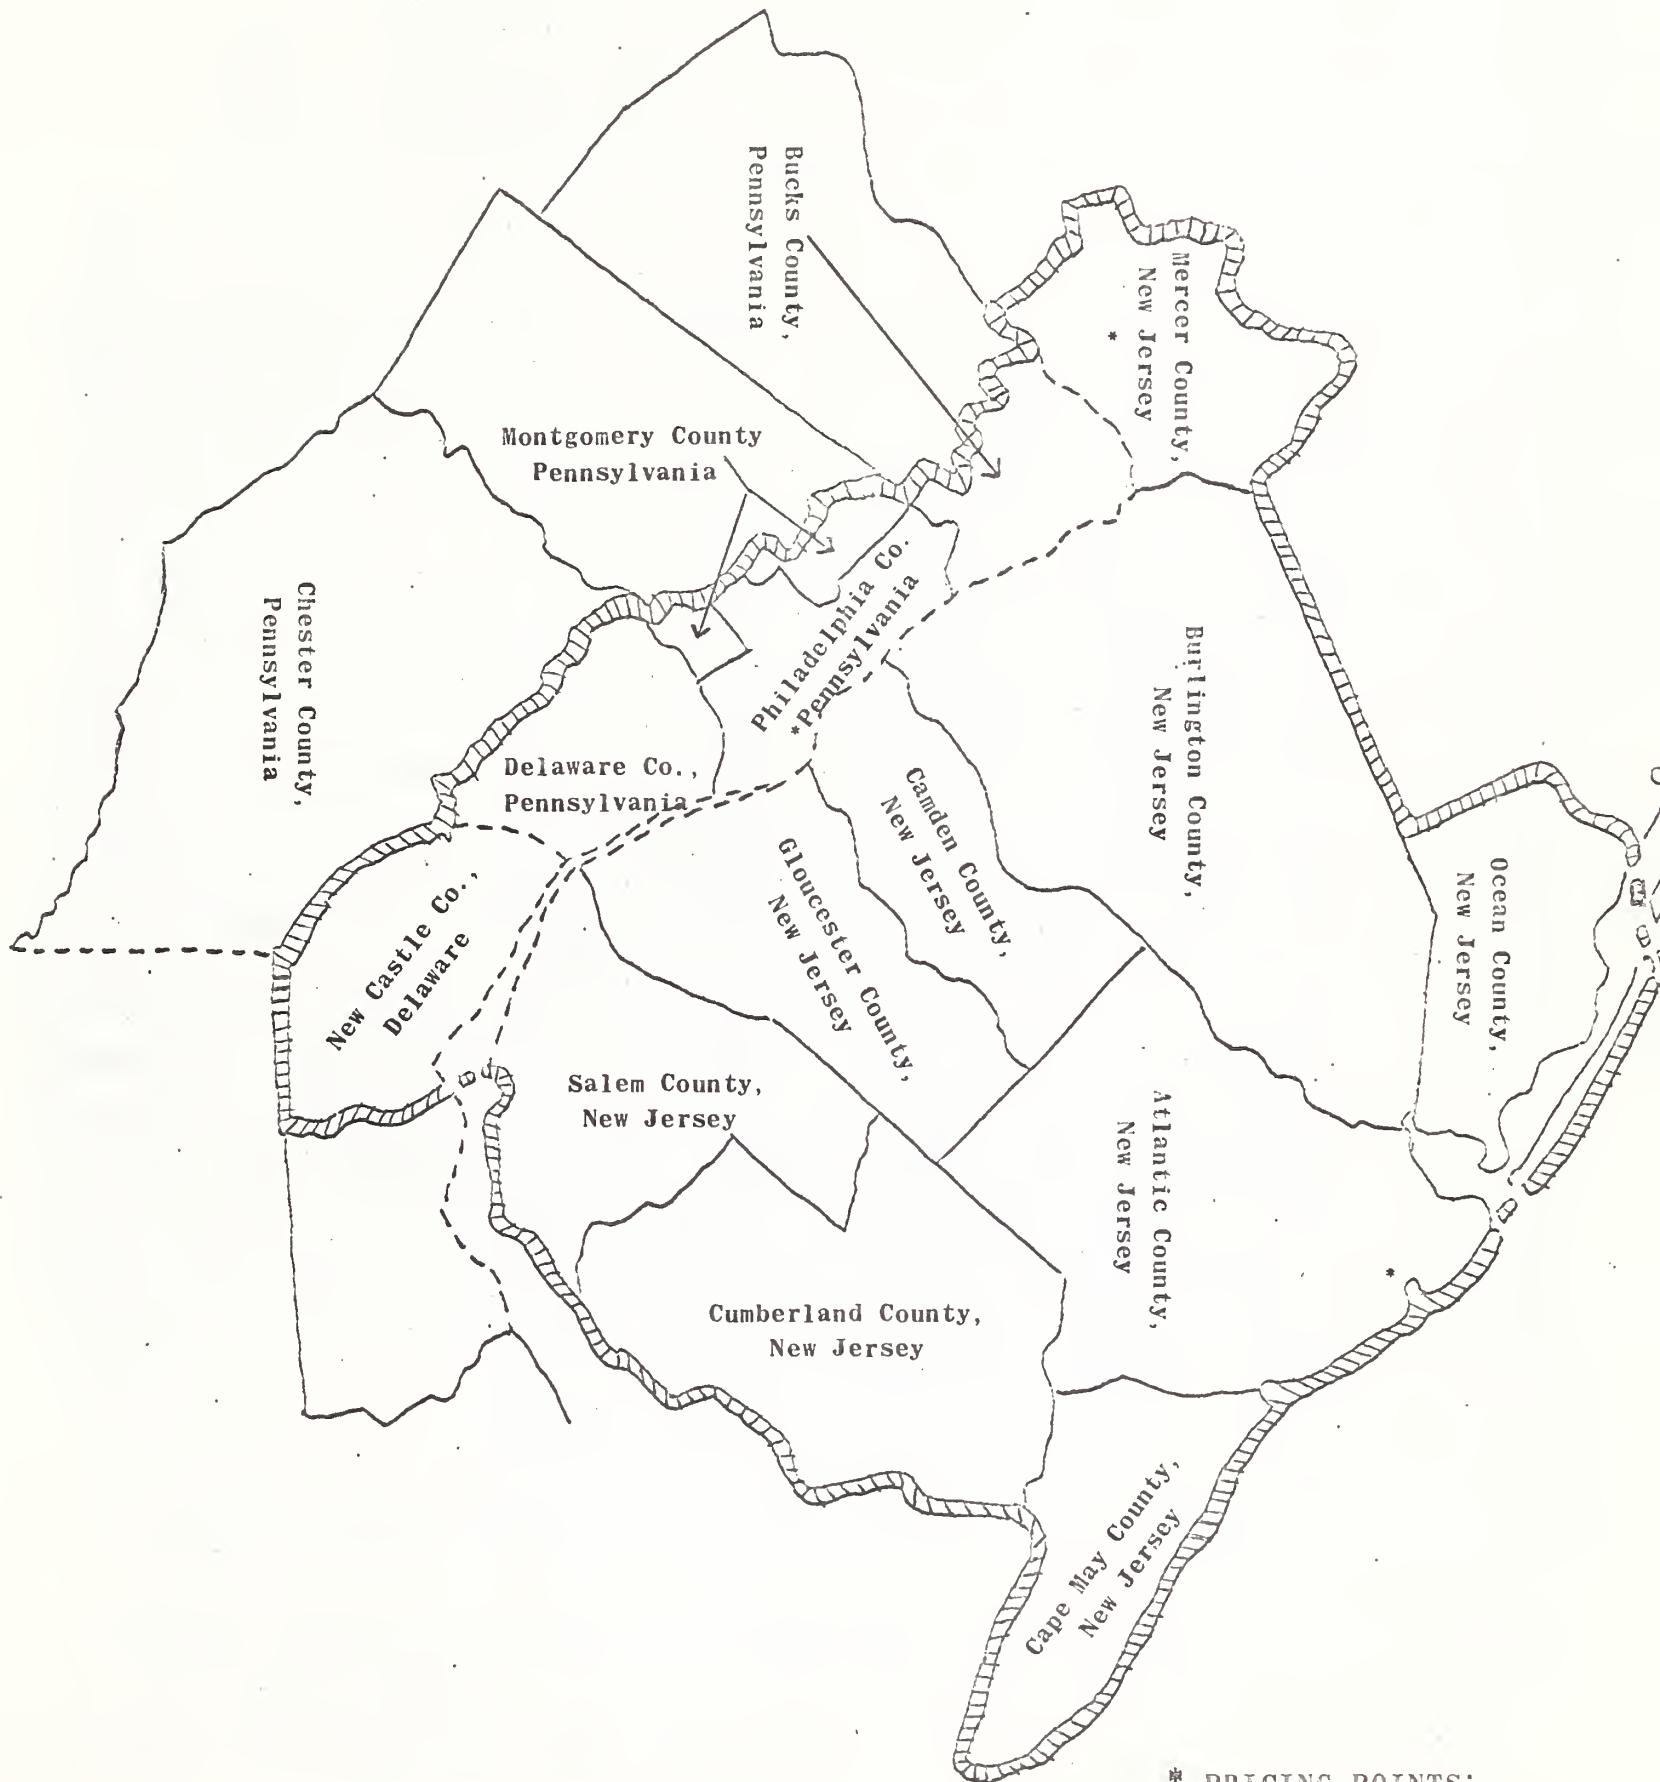

Producer milk deliveries increased almost 18 percent in 1968, to 2,284.6 million pounds. Largely responsible for this increase were additional milk supplies which were pooled under the order during the latter part of 1967, and continued to be associated with the market during 1968. The average number of dairy farmers supplying the market in 1968 was 5,231, or 601 more than the average producer number during the previous year. The Class I utilization percentage of producer milk dropped from an average of 78.4 percent in 1967 to 71.0 percent in 1968, even though an increased amount of producer milk priced by Order No. 4 went into the higher classification in 1968.

Additional receipts of milk (including skim, cream and milk equivalent of concentrated products) reported by Order No. 4 handlers during 1968 included 1.4 million pounds from producer handlers and 91.1 million pounds from principally other order plants.

Class I Milk Disposition

Daily fluid milk disposition (on routes and by shipments) from plants fully regulated by Order No. 4 averaged 4.54 million pounds in 1968, an increase of 4.1 percent over the 4.36 million pound average one year earlier. Route disposition within the Delaware Valley Marketing Area averaged 3.9 percent above 1967, while out-of-area Class I sales increased 4.7 percent in 1968.
